

Washington County resident praises judge's ruling and FACE

Letter to the Editor, The Sandersville Progress

January 3, 2011

My Two Best Christmas Presents

I have an incurable lung disease and have great difficulty breathing.

1. I am thankful that with Judge Walker's decision I do not have an extra pollutant added to the air (coal dust from the Washington County coal plant).

2. A group of Washington County people are trying to keep our beautiful county free of coal dust and this decision is a small victory for their cause.

Future generations will suffer for a few people to get a few dollars added to their income if the judge's decision isn't made permanent. Think about it. Is it worth it?

No. No. No.
